

WARRANTY ON DIESEL FUEL INJECTION PUMPS AND INJECTORS**CUSTOMERS PLEASE TAKE NOTE OF THE FOLLOWING
TERMS AND CONDITIONS:**

We guarantee all new parts fitted and workmanship for a period of 12 months or 20 000km, whichever comes first, subject to correct usage and clean fuel.

Guarantee remains firm provided that the repair has not been tampered with and the seals are intact.

All overhauled diesel fuel injection pumps have a three month guarantee from date of invoice.

Please note that when fitting the fuel injection pump or injectors to the vehicle, the tank and all the fuel lines must be checked and cleaned and the fuel filter must be replaced. It is of utmost importance that cleanliness be maintained at all times during the installation of these components.

Injector failure caused by dirty or contaminated fuel is not covered by warranty.

If the above is not adhered to, failure could occur shortly after service and this will render the warranty null and void.

The guarantee covers any defective workmanship on the diesel fuel injection pump and carries an OEM (Original Equipment Manufacturers') warranty on parts fitted.

WARRANTY, TERMS AND CONDITIONS

Continued

PLEASE MAKE SURE OF THE FOLLOWING BEFORE FITTING THE INJECTORS:

- Remove the vehicle fuel tank and clean thoroughly.
- Clean all fuel lines, pipes, fittings and filter housing with a non-toxic solvent and blast clean with high pressure air.
- Clean our cylinder head injector holes.
- Lubricate injector O-rings before fitting
- Torque injectors to specification.
- Set injector tappets to specification.
- Fit only genuine fuel filters.
- Turn engine slowly by hand before attempting to start.

After injector installation, it is important to test drive the vehicle in conjunction with diagnostics to establish if there are any underlying faults with the fuel system that may have been initially responsible for injector failure.

Some systems require that the injectors are coded to the vehicle.

Diesel Lab will not be responsible for towing/ labour charges etc. in the event of malfunction. Should any problem occur associated with the diesel fuel injection pump at any stage after and within the warranty period, it is imperative that Diesel Lab be informed in order for it to be attended to immediately. In many cases the problem can be rectified immediately and thus avoiding damages.

NOT COVERED BY THE WARRANTY:

- Breakages and/or defects resulting from water and/or dirt
- Any defects caused by incorrect installation
- Defects caused by incorrect power supply to the pump or system
- Defects caused by fuel starvation (e.g. blocked fuel supply/return lines, fuel filter etc.)
- Driver abuse or negligence in any form.
